

2020 Guidelines Science In-Service: Your Guide to the Guidelines

Available October 21, 2020. Pre-order today at ShopCPR.Heart.org!

September 8, 2020

The American Heart Association is excited to announce that the **2020 AHA Guidelines for CPR and ECC Science In-Service eLearning Course** will be available October 21, 2020 – the same day as the official 2020 AHA Guidelines for CPR and ECC are published! The Science In-Service is designed for healthcare providers, specifically staff of healthcare institutions and emergency medical services who are seeking a fast and convenient way to learn the latest resuscitation science and key changes.

This interactive, self-paced, multidisciplinary course offers a full overview of resuscitation science changes impacting basic, advanced, and pediatric life support, and highlights science and guidelines recommendations that are most significant, or that will result in changes in resuscitation practice and protocols. The Science In-Service can help healthcare institutions and professionals adjust practices between the release of the 2020 guidelines and their next BLS, ACLS, or PALS course update.

Course content includes:

- Basic Life Support Science Updates
- Advanced Cardiovascular Life Support Science Updates
- Pediatric Life Support Science Updates

Upon successful course completion, providers will be able to access a course completion certificate.
